CAD PROJECT PLANNING

Our CAD planner are responsible for all aspects of planning custom projects, from calculation of initial quantities to producing CAD based seaming diagrams for approval and final installations.

CAD planners are working close to Sales and Design all working to the main objective of planning the projects as timely and accurately as possible.

The role includes CAD design and the high levels of attention to detail that comes with working on high profile projects. For instance we will visit sites to survey, reading and interpreting project plans, creating project drawings and room layouts, and advising the project management team on details such as weave widths, pattern repeats, often in the context of a very complex space. And will also be heavily involved in the continued progress of projects, monitoring timelines, ensuring details are ready and accurate for production and meeting of set-standard.
